## Attachment 1: Evaluation of the ready for duty course as an example of the follow-up survey 3-6 months after the course

I have been able to integrate and apply the communication skills acquired through the course in my everyday work.

I found the Ready for Duty course useful for networking with colleagues within the hospital/at other hospitals.

Looking back at the Ready for Duty course, I think it is useful for doctors at the start of their career.

DOI: 10.3205/zma001714

I have been able to integrate and apply the practical skills acquired through the course in my everyday work.

The modules have enabled me to improve my communication skills.

The evaluation was carried out using a Likert ordinal scale from 1 to 5 (definition of the range shown under the xaxis of each diagram) on the basis of a survey on paper. n=number of participants; SD=standard deviation.
